EAVS™

Ellis Aquatic Vigilance System™

Powered by advanced artificial intelligence (AI) and video analytics, EAVS™ is the world's most complete drowning prevention, safety, and security vigilance system. EAVS™ provides "supplemental eyes" covering activity throughout the facility.

EAVS™ protects your facility day and night

- ☑ Monitor activities in and away from lifeguarded zones
- ☑ Programmable alarms to alert staff
- ☑ Shorten recognition & response time
- ☑ Remotely audit staff performance
- ☑ Track location and activity of all guests
- ☑ Cost effective preventative measure

Cameras

High-quality analytic cameras provide 360-degree coverage day and night.

Computer

Capable of learning patterns, behaviors, and movements that create alerts allowing lifeguards, supervisors, and security personnel to be automatically alerted to potential risk.

Scalable

Each element of EAVS is custom-designed to meet facility needs. Cameras provide thorough coverage of each attraction.

Real-Time Notification

Operators and Artificial Intelligence combine for video surveillance, communication, and incident location. Alerts via two-way radios, cell phones, and email, provide rapid response saving lives and securing property.
